

Myth busted:

Java workloads run **faster** on Intel.

Speed up in two steps.

Learn How

Results of performance testing on Elasticsearch, Apache Cassandra, and Apache Spark workloads with Intel® Xeon® Scalable processors, Amazon Web Services (AWS) Graviton2 processors, and AMD EPYC processors.

Prowess Consulting. "Java-Based Benchmarking Shines a Light on How Underlying Architecture Impacts Cloud Performance," 2022 (commissioned by Intel).
