Accelerated by Intel® brand is available to Intel® Partner Alliance solution providers who offer solutions accelerated by Intel technologies.

accelerated by **intel.**

## How Can Your Solution Qualify for the Accelerated by Intel® brand?

In addition to running on an Intel® processor, there are many ways to optimize on Intel. It's very likely your solution will be able to—or already does—leverage one or more built-in Intel CPU features or takes advantage of Intel development and optimization tools. Your solution might also benefit from additional Intel® hardware technologies that accelerate and optimize data storage, data movement, and more. Check to see if your solution already takes advantage of one or more of the items in the table on the next page.

To earn Accelerated by Intel, your solution must run **on an Intel® CPU** and take advantage of one (or more) of the following: A Processor-Based Optimization, **OR** Software Tools-Based Optimization, **OR** Optimized Product **AND** Software Tools-Based Optimization.
