

Product Change Notification

Change Notification #: 119393-00

Change Title: MINOR CHANGE, Shipping Media Label Change
PCN 119393-00, Transport Media,
Adding Box Number on the Standard Multiple FPO
Label

Date of Publication: January 06, 2023

Key Characteristics of the Change:

Transport Media

Forecasted Key Milestones:

Date Customer Must be Ready to Receive Post-Conversion Material	February 04, 2023
--	-------------------

Description of Change to the Customer:

Intel is updating the Standard Multiple FPO Label used conditionally to ship products to customers. Not all customers use or see this Standard Multiple FPO Label. For those that do, a new box number identifier value will now be displayed at the bottom right of the label. This is for internal use by Intel.

The change is a process improvement done to aid in the warehousing and shipment of products. It will visually represent the shipping box number in the shipment that correlates to the multiple FPO label eliminating the need for detailed label validation down to the FPO level.

Customer Impact of Change and Recommended Action:

This is a generic advisory notice. Intel considers this change to be a MINOR CHANGE. There is no impact to the form, fit, functionality, quality, or reliability to the products being shipped.

This change is a visual change only and applies exclusively to the Standard Multiple FPO Label. All other labels used in the shipment of products will remain the same.

This change impacts a very minimal number of Intel customers. If customers do not use the Standard Multiple FPO Label in receiving products, this change notification can be ignored.

Customers should share this change with their inbound logistics departments to ensure no delays in receiving products.

Please check with your internal receiving department(s) to determine if you are impacted or you may also try to contact your Intel Field Representative for any questions or concerns.

Products Affected/Intel Ordering Codes:

This label change is not specific to any particular product. It applies to any shipment to customers that may require the use of the Standard Multiple FPO Label. As such, the use of this label is conditional and no specific product impacted list can be provided at this time. Customers are advised to check with their internal receiving department to determine if they are impacted.

Notices & Disclaimers

No license (express or implied, by estoppel or otherwise) to any intellectual property rights is granted by this document.

Intel disclaims all express and implied warranties, including without limitation, the implied warranties of merchantability, fitness for a particular purpose, and non-infringement, as well as any warranty arising from course of performance, course of dealing, or usage in trade, except as provided in a separate written agreement.

You may not use or facilitate the use of this document in connection with any infringement or other legal analysis concerning Intel products described herein. You agree to grant Intel a non-exclusive, royalty-free license to any patent claim thereafter drafted which includes the subject matter disclosed herein.

The products described may contain design defects or errors known as errata which may cause the product to deviate from published specifications. Current characterized errata are available on request.

Statements in this document that refer to future plans or expectations are forward-looking statements. These statements are based on current expectations and involve many risks and uncertainties that could cause actual results to differ materially from those expressed or implied in such statements. For more information on the factors that could cause actual results to differ materially, see our most recent earnings release and SEC filings at www.intc.com.

Customer is responsible for safety of the overall system, including compliance with applicable safety-related requirements or standards.

Intel technologies may require enabled hardware, software or service activation.

No product or component can be absolutely secure.

Your costs and results may vary.
