Description of Change to the Customer:

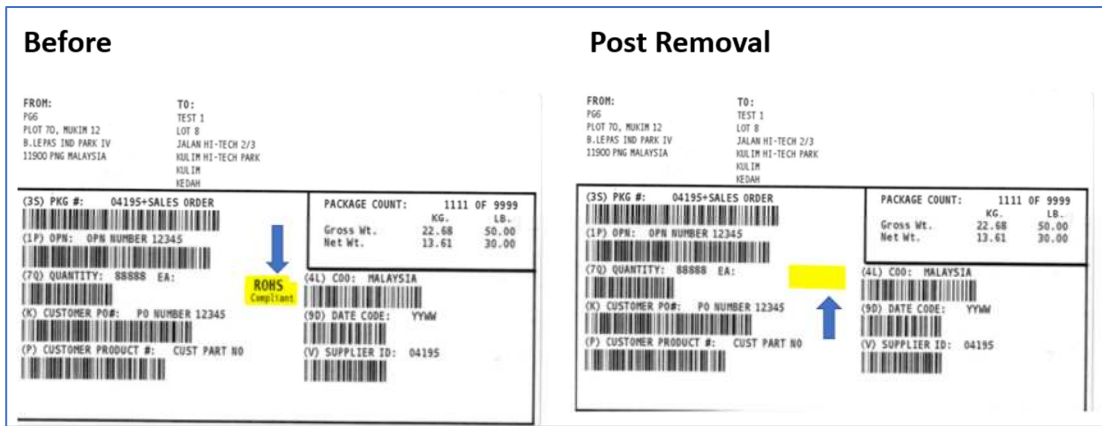

Intel is making two minor changes pertaining to the Restriction of Hazardous Substances (RoHS):

1. On all labels used in packaging or shipping, wherever the words “RoHS Compliant” are seen, this verbiage will be removed completely.

Without listing ALL possible label examples herein, below are just two examples demonstrating the removal of the verbiage “RoHS Compliant”.

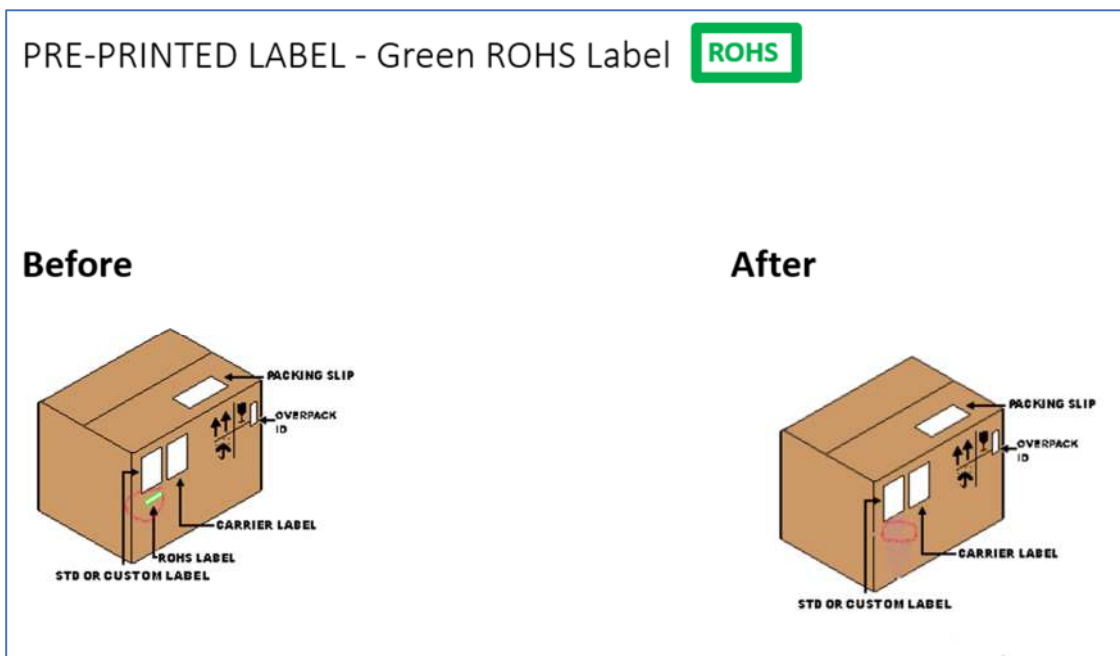

(Example of a standard intermediate box label (I-box) where the verbiage is removed, forcing any remaining values to be left justified)

Example of a distribution intermediate box label (I-box) where the verbiage is removed

2. The removal of a pre-printed green RoHS sticker on the Shipping Box used for Silicon Products. The Pre-Printed Green RoHS Sticker, if still seen on a Shipping Box will no longer be used.

(The green pre-printed sticker would appear just below any standard/custom label and this graphic/picture is for illustration purposes only)

The reason for these changes is for Intel to help keep interpretations clear. With the adoption of the industry RoHS 2, the use of this extra verbiage “RoHS Compliant” is deemed unnecessary, no longer required and Intel does not wish to accidentally confuse any customers due to the possibility of misleading markings or interpretations.

Customer Impact of Change and Recommended Action:

Intel considers these changes as a Minor Change. There is no change to the Form, Fit, Function, Quality or Reliability of the products as a result of this change.

Intel will not repack products which were previously packaged that have either the RoHS Compliant verbiage or which may have the green RoHS sticker on boxes. Therefore, customers should expect to see products shipped with both the older and newer methods for several months until inventory with the older labels & boxes are depleted.

Please contact your local Intel representative with any questions or concerns regarding the changes communicated in this notification.
