NON-STANDARD WORK / PRE-TASK PLAN WORKSHEET Non-Standard Work/Pre-Task Plan Worksheet

INSTRUCTIONS: This worksheet is to be used prior to undertaking non-standard / non-documented work. Complete before engaging in non-standard / non-documented work. Use Part F to develop safe written procedure(s).

Intel Owner:	Tool ID / Description:	Effective Date:
Supplier Contact:	Brief Description of Work:	

Pre-Task Planning Checklist

Purpose: To mitigate all potential safety hazards before engaging in any non-documented / non-standard work.

A.	SAFETY: Please describe control measures in Section "G" for any Safety item checked "Yes"	YES	NO
1.	Are barricading and/or signage required to protect personnel, facilities or equipment?		
2.	Will work involve live systems or energized equipment?		
3.	Is lockout/tagout of hazardous energies required?		
4	ECP Template		
4.	Will work involve exposure to falls of 4 feet or greater for non-construction work or 6 feet or greater for construction work?		
_			
5.	Are ladders, MEWP, scaffolds or work platforms needed to perform the task safely?		
6.	Does this work involve working around or near overhead vehicles (i.e. Fab automated material handling systems) within 2ft? If so, are hazards controlled?		
7.	Will the task involve use of powered industrial truck (PIT)/forklift.		
	a. If load is being horizontally moved; is load secured or alternate securing plan been created?		
8.	Will the task involve the use of chemicals or have the potential for chemical exposure?		
	a. Does the work require disposal of chemicals?		
	b. Will the work generate odors (odor notification posted and security notified)?		
	c. Does task require special PPE?		
9.	Does this task require the demolition of electrical/chemical systems or equipment?		
10.	Does this task require entry into a confined space?		
11.	Does this task involve use of inert gas or other potential to create oxygen deficiency?		
12.	Does this work involve removing raised floor tiles and/or working under the raised floor?		
13.	Will work involve working with sharp tools or materials (e.g., sharp edges, knives, Unistrut, etc.)		
14.	Will work involve elevated noise levels?		
15.	Will work involve defeating equipment safety interlocks (use Interlock Defeat signage & return to normal configuration)?		
В.	ERGONOMICS: Please describe control measures in section "F" for any ergonomics items checked "YES"	YES	NO
B. 1.	ERGONOMICS: Please describe control measures in section "F" for any ergonomics items checked "YES" Do material handling / lifting tasks exceed weight limits for safe one person handling? Verify weight of objects to be lifted	YES	NO
1.		YES	NO
1. or n	Do material handling / lifting tasks exceed weight limits for safe one person handling? Verify weight of objects to be lifted	YES	NO
1. or n	Do material handling / lifting tasks exceed weight limits for safe one person handling? Verify weight of objects to be lifted noved. Typically, objects over 25 pounds require two people and objects over 50 pounds require use of a mechanical assist	YES	NO

Does the work involve a tool or equipment move?	YES	NO

NON-STANDARD WORK / PRE-TASK PLAN WORKSHEET

D. PERMITS: Are any of the following permits required to perform task?						
		Nobile Elevated Work Platform 🗖	Confined Space			
E. PF	PE REQUIREMENTS:					
	Fall Protection □ Head □ Eye □ Foot / Toe □ Apron □ Respirator □	Face Shield □ OTHER:	Ear Protection			
What t	ype of glove does your task require?					
	Kevlar □ Latex □ Electrical □ Thermal fy type of chemical glove on the back (e.g. chemical resistant latex or nitrile)	□ Chemical* □	None □			
	AZARD ANALYSIS / PROCEDURE - Use the following section to develop the safe written promeasures for items marked 'YES' in sections 'A', 'B', and 'C".	ocedure for this activity. Please des	cribe the tasks and			
Step	Action	Hazard(s) / Control Mea	isure(s)			
G. SAFETY TRAINING – Have workers completed all required safety training for the task they are performing? The following are examples of training that might be required. Check if needed and list additional safety courses that are applicable for hazards not part of normal job scope.						
	Electrical Safety □ Workplace Specific Hazcom PPE Training □ (new chemicals) □	Respiratory Protection □	Radiation Training			
Power	Powered Industrial Truck Control of Hazardous Confined Space Confi					
All team members involved in the work activity must sign the PTP:						
	Approver:					
For escorted guest workers, the escort will validate that a pre-task plan has been completed prior to entry						
IF WORK CONDITIONS/ACTIVITIES CHANGE, WORK <u>MUST STOP</u> AND A NEW TASK PLAN REVIEWED						
	PTP should be posted at the work location for the duration of the activity
