Powered by Thunderbolt™

Thunderbolt™ offers a best-in-class set of product capabilities to deliver the simplest, most reliable, and fastest cable solution available for connecting a PC to displays, your favorite accessories, PC charging and with Thunderbolt share, connecting to a second PC. Thunderbolt™ Share takes advantage of the industry leading performance of Thunderbolt™ to deliver extraordinary bandwidth and low latency for a responsive and seamless experience.
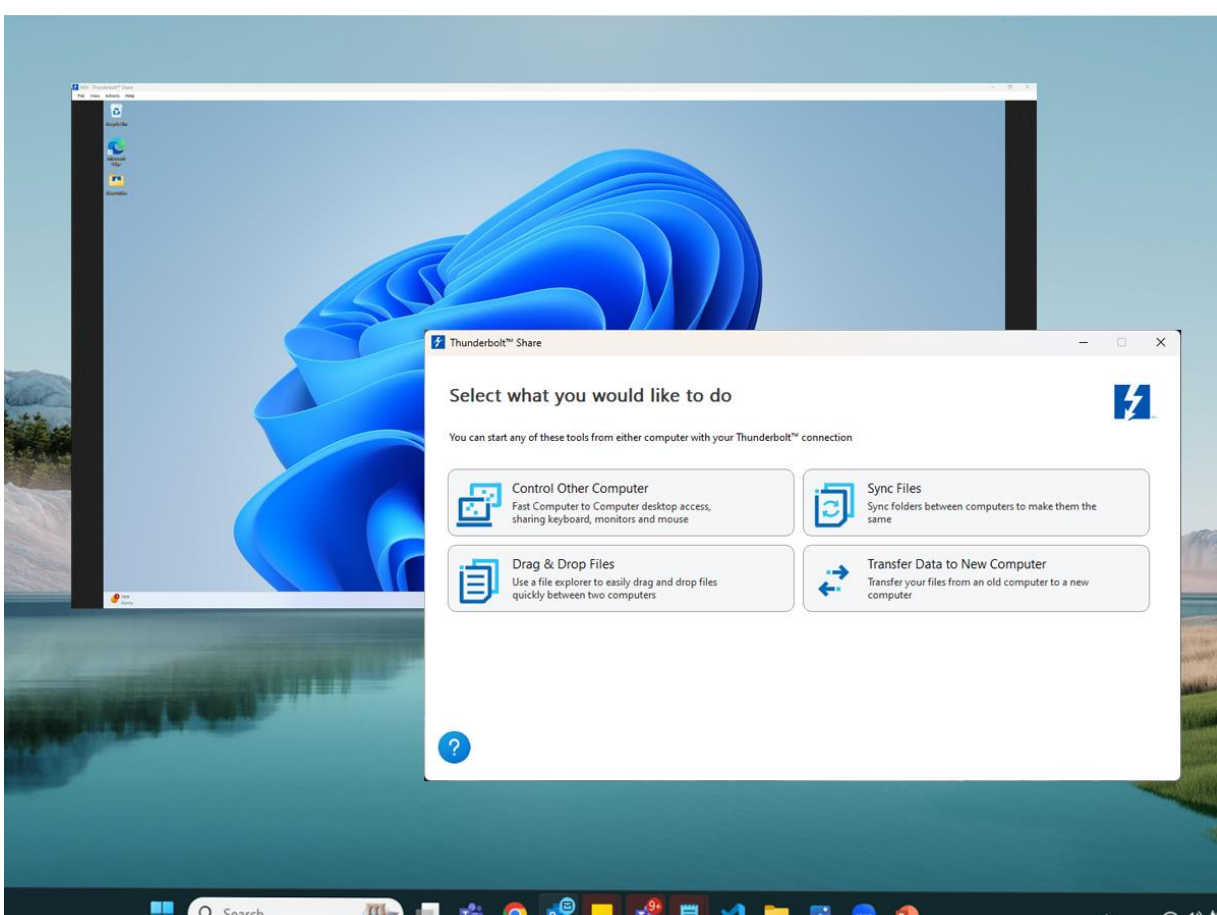

Thunderbolt™ Share

New Multi-PC Experiences

Thunderbolt™ Share unlocks ultra-fast PC-to-PC connectivity experiences that fundamentally change the way users interact with two PCs with an intuitive easy-to-use interface allowing for more productive workflows or maximizing space and performance, all with two PCs.

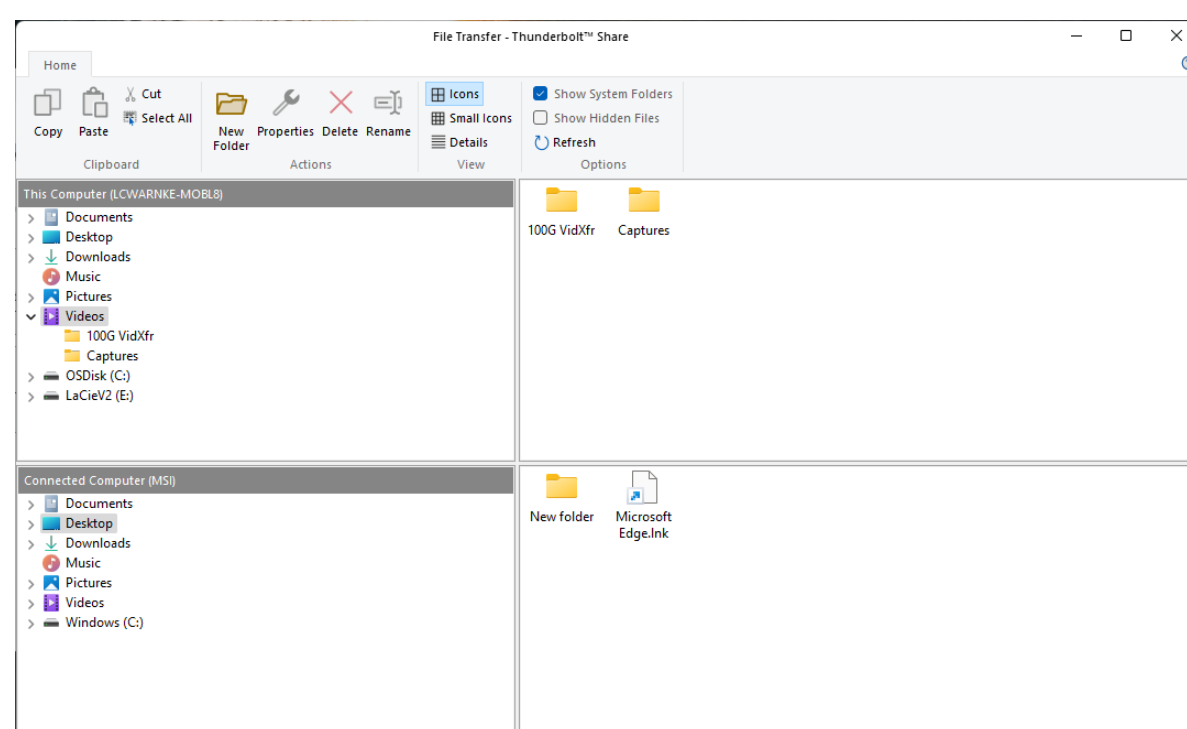

Screen Share Seamlessly

Thunderbolt™ Share allows users to control their other computer, harnessing the productivity of utilizing two computers at once.

Being able to control one PC from another PC is a powerful tool that allows users to share common peripherals and be more productive by making multitasking between two computers seamless.
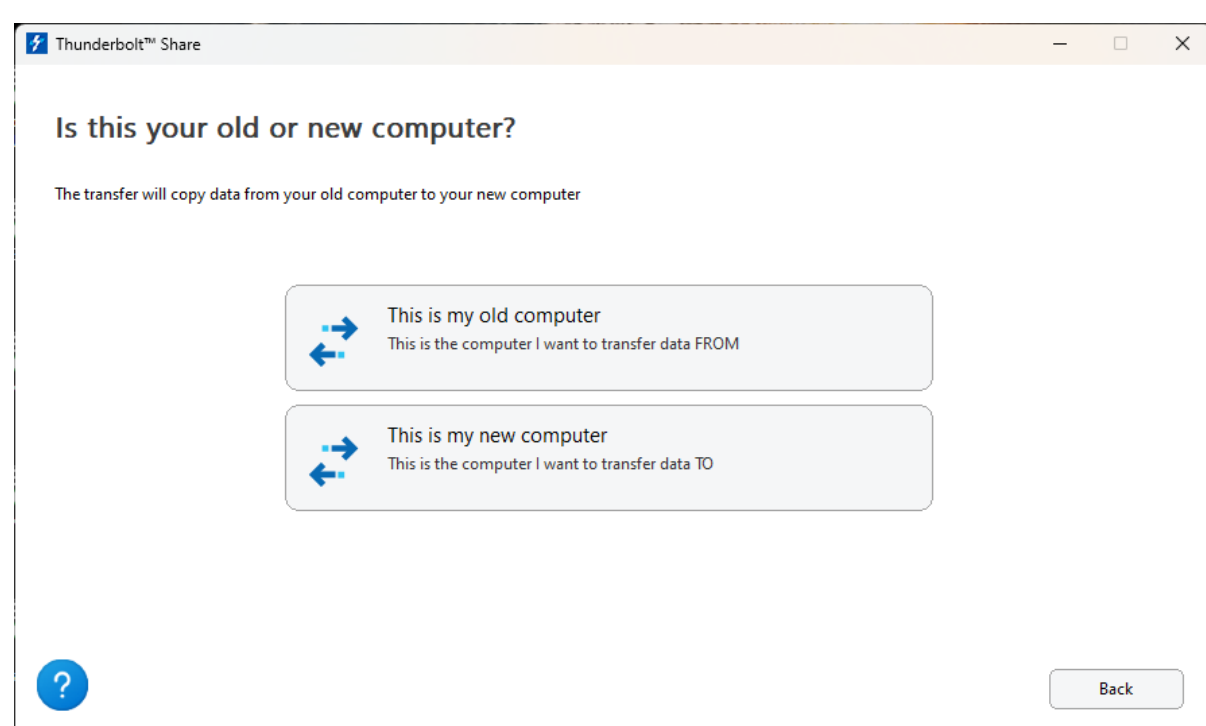

Drag & Drop

Accessing files between two PCs couldn't be more efficient. Simply drag and drop files and folders all at the speed of Thunderbolt™.

Common commands are also available, such as "copy", "paste", and "cut" for files across both of their systems.

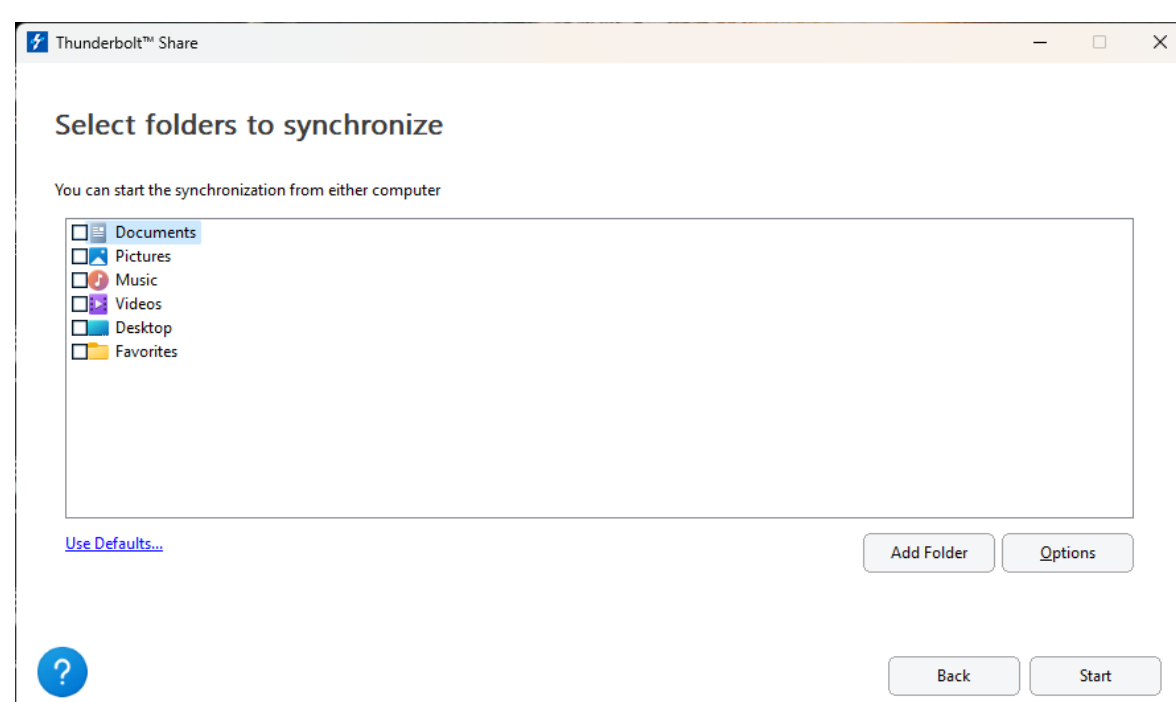

Upgrade Fast

Transferring data from an old computer to a new computer has never been easier than with Thunderbolt™ Share. Users can quickly migrate their files and folders from one computer to another computer far faster than using Wi-Fi or the Cloud.
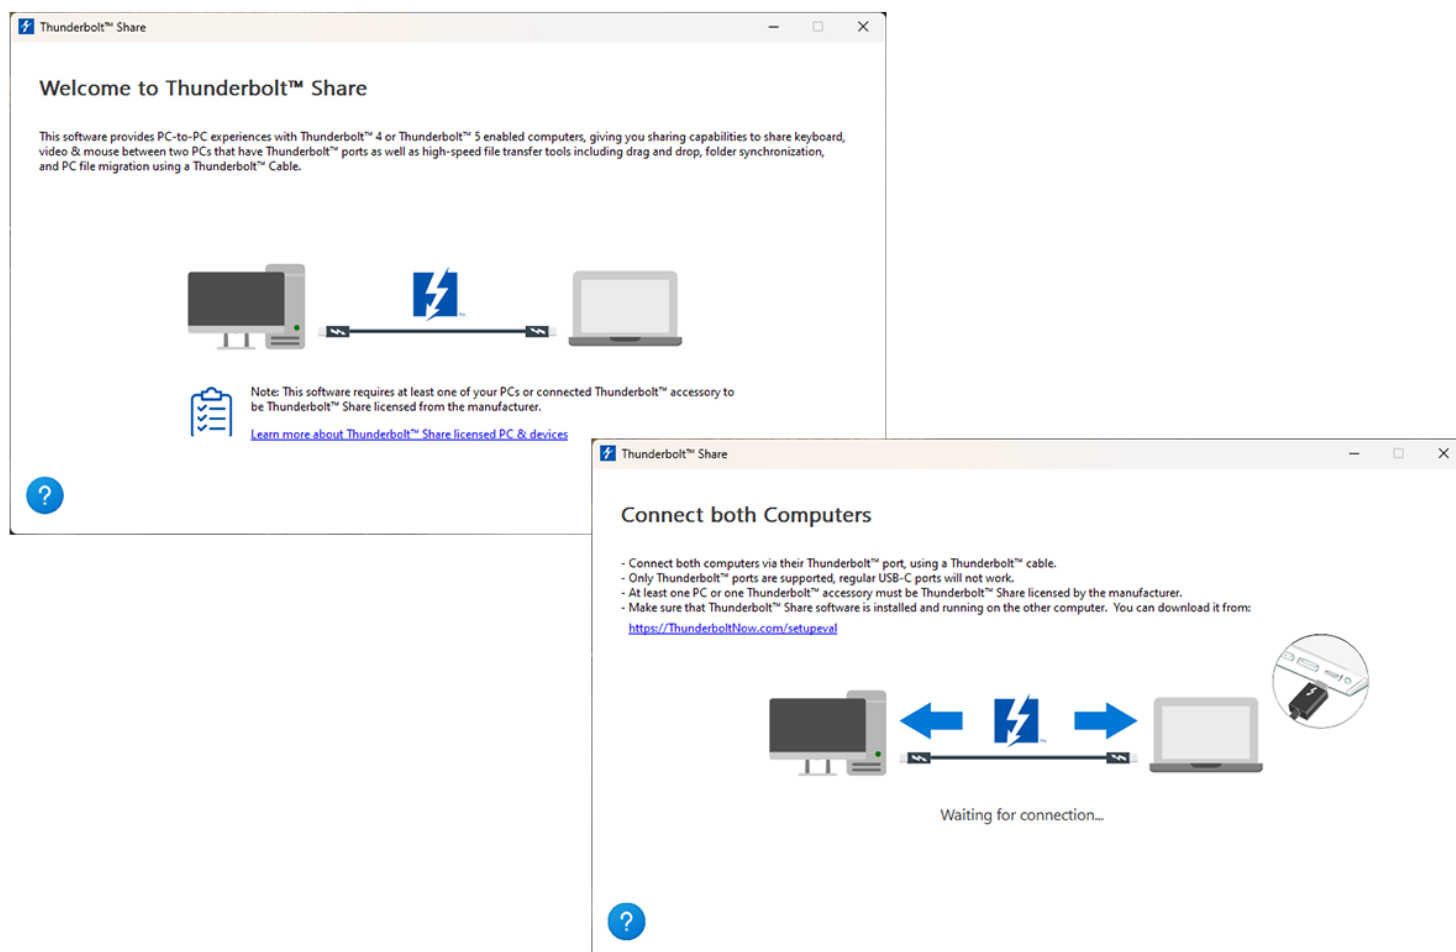

Synchronize Files & Folders Effortlessly

Thunderbolt™ Share gives users the power to effortlessly synchronize files and folders across two PCs.

Back-up your personal files, gaming libraries or improve workflows while working on large creative projects.

Easy Set-Up

Once you have downloaded the software, simply connect two PCs with a Thunderbolt™ cable to begin using Thunderbolt™ Share.

Flexible Configurations

Thunderbolt™ Share takes advantage of the flexible configurations offered by Thunderbolt™ technology. Easily connect two Thunderbolt™ enabled PCs directly with a Thunderbolt™ cable or with a Thunderbolt™ accessory.

•Directly between two Thunderbolt™ enabled PCs

•Via a Thunderbolt™ dock

•Via a Thunderbolt™ monitor
