Intel® Server Board S2400SC

Server Test Submission (STS) Report

For Solaris* Operating System Certification

Rev [1.0]

[June 18th, 2012]

This report describes the Intel® Server Board S2400SC Solaris* Operating System Certification test run conducted by Intel Enterprise Platforms and Services Division (EPSD). The –NR designation in the product name indicates that this certification applies to non-RAID configuration.

Purpose of this submission:

First time system submission for the Solaris* Operating System Certification for the Intel® Server Board S2400SC.

Submission Type:	Reason for test run	Check one
First Time Submission	Initial Solaris* Operating System Certification submission. New product submission.	☑
System Update	Hardware update. (For example, update submission test run with new processor speeds).	☐
BIOS Update	BIOS and/or firmware update. (For example, update submission test run with new BIOS to support additional processor speeds).	☐
OS Update	OS update. (For example, update submission test run to add new version of Solaris* Linux to product).	☐

Intel Server Board Submission Report: Completion of WLP

Data in this section reflects system submission information at the time of the Solaris* Operating System Certification submission.

Submission Information

Submission ID		
Submission ID	9485	
Submission Type		
	Check Submission Type	**Comments**
First-Time Hardware and Driver Test Submission	☑	
System Update Test Submission	☐	
Product Category		
Hardware Category	PC System or Server	
Operating System family	Solaris* Operating System	
Product Detail		
General Product Information		
Equipment Type	Server	
Primary Target Market	Business/Corporate	
Compliance	All applicable requirements	

Server Board Configuration Information

Processor	
Quantity	2
Front Side Bus Speed / QPI	8.0 GT/s (Gigatransfers per sec)
Family/Model	Intel® Xeon E5 2400 series
Speed	1.60,1.80,1.90, 2.00, 2.10, 2.20, 2.30, 2.40 GHz
System Memory	
Amount Installed	64 GB
Memory Type	DDR3
Server Board Product	
Board PBA	G18552-402
Board Manufacturer	Intel Corporation
Board Model	Intel® Server Board S2400SC
North Bridge Chipset Manufacturer	NA
North Bridge Chipset Model	NA
South Bridge Chipset Manufacturer	Intel Corporation
South Bridge Chipset Model	Intel® C602 (-A) chipset with support for Intel® C600 RAID Upgrade Keys
BIOS	
BIOS Manufacturer	AMI*
BIOS Version	SE5C600.86B.01.02.0006.032920121341
BIOS Date	03/29/2012
BIOS URL (For Updates)	http://downloadcenter.intel.com/Detail_Desc.aspx?agr=Y&DwnldID=21304&lang=eng&OSVersion=OS%20Independent&DownloadType=Firmware

Appendix A – Submission History

Solaris* Operating System Certification submission history for the Intel® Server Board S2400SC:

Submission ID	Type	Date	OS Qualified	Processor Speeds	Board Revision	BIOS Version
9485	First Time	[06/18/2012]	Solaris* Operating System 10 U9	1.60,1.80,1.90, 2.00, 2.10, 2.20, 2.30, 2.40 GHz	-402	SE5C600.86B.01.02.0006.032920121341
