

# Twin Lake/Amston Lake/Alder Lake-N IPU Bring Up Guide

User Guide

---

April 2025

You may not use or facilitate the use of this document in connection with any infringement or other legal analysis concerning Intel products described herein. You agree to grant Intel a non-exclusive, royalty-free license to any patent claim thereafter drafted which includes subject matter disclosed herein.

No license (express or implied, by estoppel or otherwise) to any intellectual property rights is granted by this document.

All information provided here is subject to change without notice. Contact your Intel representative to obtain the latest Intel product specifications and roadmaps.

The products described may contain design defects or errors known as errata which may cause the product to deviate from published specifications. Current characterized errata are available on request.

Copies of documents which have an order number and are referenced in this document may be obtained by calling 1-800-548-4725 or visiting the [Intel Resource and Documentation Center](#).

Intel technologies' features and benefits depend on system configuration and may require enabled hardware, software or service activation. Performance varies depending on system configuration. No product or component can be absolutely secure. Check with your system manufacturer or retailer or learn more at [intel.com](#).

## Revision History

---

Date	Revision	Description
April 2025	1.0	Initial release.

## 1.0 Introduction

---

### 1.1 Terminology

Table 1. Terminology

Term	Description
BIOS	Basic Input/Output System
DMABuf	Direct Memory Access Buffer
GPIO	General Purpose Input/Output
IPU	Imaging Process Unit
I2C	Inter-Integrated Circuit
Mmap	Memory-Mapped
OEM	Original Equipment Manufacturer

## 2.0 BIOS Configuration

The values of GPIO pads and I2C buses are determined from the board schematic design. Please refer to OEM board schematic design to obtain these values.

### 2.1 AR0234 BIOS Configuration

Figure 1. AR0234 Control Logic & Camera Configuration

## 3.0 IPU User Space Libraries

---

### 3.1 Github Build

#### 3.1.1 Ipu6-camera-bins

Clone this repository, [ipu6-camera-bins](#) and check out to the following build tag, [TWL PV](#).

```
git clone https://github.com/intel/ipu6-camera-bins.git
cd ipu6-camera-bins && git checkout v1.0.0-twl-pv-v6.12
```

Copy over binaries to target file path:

```
cp -r ipu6-camera-bins/include/* /usr/include/
cp -r ipu6-camera-bins/lib/* /usr/lib/
```

#### 3.1.2 ipu6-camera-hal & icamerasrc

Clone these repositories, [ipu6-camera-hal](#) , [icamerasrc](#) and check out the following build tag respectively, [ipu6-camera-hal-v1.0.0-twl-pv-v6.12](#) and [icamerasrc-v1.0.0-twl-pv-v6.12](#).

```
git clone https://github.com/intel/ipu6-camera-hal.git
cd ipu6-camera-hal && git checkout v1.0.0-twl-pv-v6.12
cd .. && git clone https://github.com/intel/icamerasrc.git
cd icamerasrc && git checkout v1.0.0-twl-pv-v6.12
```

Copy the build.sh one directory level above, the same as ipu6-camera-hal repo and ipu6-icamerasrc repo.

```
cp ipu6-camera-hal/build.sh .. && cd ..
```

Run the following command to build libcamhal and icamerasrc libraries,

```
./build.sh -d --board ipu_adl
```

Install libraries to the target filepath:

```
cp -r ./out/<target>/install/etc* /etc/
cp -r ./out/<target>/install/usr/include/* /usr/include/
cp -r ./out/<target>/install/usr/lib/* /usr/lib/
```

## 4.0 System Environment

---

### 4.1 Wayland System Environment

Add the following configuration in `~/.bashrc` under user mode and root mode respectively:

```
export DISPLAY=:0;xhost + ; source /etc/profile
```

Add the following environment variables into `/etc/profile`:

```
export LIBVA_DRIVERS_PATH=/usr/lib/x86_64-linux-gnu/dri
export LIBVA_DRIVER_NAME=iHD
export
PKG_CONFIG_PATH=/usr/local/lib/pkgconfig:/usr/lib64/pkgconfig:/usr/lib/pkgconfig
export
LD_LIBRARY_PATH=/usr/local/lib:/usr/lib64:/usr/lib:/usr/lib/x86_64-linux-gnu
export GST_PLUGIN_PATH=/usr/lib/gstreamer-1.0
export GST_GL_PLATFORM=egl
export GST_GL_API=gles2
export logSink=terminal
rm -rf ~/.cache/gstreamer-1.0
```

## 5.0 IPU Workloads

---

### 5.1 AR0234 with mmap Pipeline

```
gst-launch-1.0 icamerasrc num-buffers=-1 scene-mode=normal
device-name=ar0234-1 printfps=true io-mode=1 ! 'video/x-raw,
format=NV12, width=1280,height=960' ! glimagesink sync=false
gst-launch-1.0 icamerasrc num-buffers=-1 scene-mode=normal
device-name=ar0234-2 printfps=true io-mode=1 ! 'video/x-raw,
format=NV12, width=1280,height=960' ! glimagesink sync=false
```

### 5.2 AR0234 with DMABuf Pipeline

```
gst-launch-1.0 icamerasrc num-buffers=-1 scene-mode=normal
device-name=ar0234-1 printfps=true io-mode=4 ! 'video/x-
raw(memory:DMABuf), drm-format=NV12, width=1280,height=960' !
glimagesink sync=false
gst-launch-1.0 icamerasrc num-buffers=-1 scene-mode=normal
device-name=ar0234-2 printfps=true io-mode=4 ! 'video/x-
raw(memory:DMABuf), drm-format=NV12, width=1280,height=960' !
glimagesink sync=false
```

### 5.3 LT6911UXC mmap Pipeline

```
gst-launch-1.0 icamerasrc num-buffers=-1 scene-mode=normal
device-name=lt6911uxc-1 printfps=true io-mode=1 ! 'video/x-raw,
format=UYVY, width=<width>,height=<height>' ! glimagesink
sync=false
```

### 5.4 LT6911UXC with DMABuf Pipeline

```
gst-launch-1.0 icamerasrc num-buffers=-1 scene-mode=normal
device-name=lt6911uxc-1 printfps=true io-mode=4 ! 'video/x-
raw(memory:DMABuf), drm-format=UYVY,
width=<width>,height=<height>' ! glimagesink sync=false
```
