

NETAPP AIPOD MINI WITH INTEL

Affordable, simple, and secure AI anywhere you need it.
Unlock high-performing, flexible AI solutions that grow with
your business and drive transformation.

Breaking through barriers

Deploying AI inferencing at the departmental or branch level presents distinct challenges. Individual teams often require AI solutions tailored to specific use cases, such as contract analysis in legal, inventory management in retail, or predictive maintenance in manufacturing. These solutions must be cost-effective, easy to implement, and scalable. However, enterprise AI infrastructures are often oversized and unnecessarily complex for these localized needs. This mismatch leads to wasted resources and slowed innovation.

To address these challenges, NetApp and Intel have collaborated to deliver NetApp AIPOd Mini, a purpose-built runtime AI solution for departments and branch offices. This streamlined, easy-to-deploy solution removes barriers to AI adoption. By combining Intel® Xeon® processors with NetApp's trusted storage and data management capabilities, it empowers teams with precise, context-aware AI insights, seamlessly integrating into workflows to drive impactful outcomes while optimizing costs.

Harnessing the power of AI inferencing

NetApp AIPOd Mini with Intel makes AI more accessible, empowering departments across organizations to achieve meaningful outcomes. From optimizing operations to generating actionable insights, this solution is built for practical, scalable innovation. Its simplified approach helps businesses meet their goals while avoiding the common complexities of AI adoption. Seamlessly integrating into existing workflows, NetApp AIPOd Mini delivers a powerful combination of affordability, efficiency, and high performance.

An integral part solution is the Open Platform for Enterprise AI (OPEA), an open-source framework that simplifies deploying enterprise-grade generative AI solutions. OPEA ensures compatibility with current workflows and provides a modular approach to configuring and optimizing AI workloads for specific business needs. By removing technical barriers and enhancing workflow integration, OPEA accelerates results and boosts efficiency.

The solution

NetApp AIpod Mini with Intel is a fully integrated solution designed for department-level efficiency and flexibility. Key components include:

- Intel® Xeon® 6 processors with Intel® Advanced Matrix Extensions
- NetApp AFF A20 high-performance storage systems
- Open Platform for Enterprise AI (OPEA) framework

This solution is ideal for hosting departmental AI workloads, such as Retrieval-Augmented Generation (RAG) workflows, predictive analytics, and advanced inferencing models. Whether enabling local knowledge management or automating complex tasks like contract analysis or inventory forecasting, NetApp AIpod Mini drives measurable results from day one.

NetApp AIpod Mini is designed with security at its core. NetApp ONTAP's robust access control lists (ACLs) and metadata-driven governance ensure that sensitive data remains safe, preventing it from being shared inadvertently across teams or outside the organization. NetApp's unparalleled certifications, including FIPS 140-3 and NSA Commercial Solutions for Classified (CSfC), guarantee data protection at every level.

Achieve the full potential of AI inferencing

NetApp AIpod Mini with Intel combines the raw power of Intel Xeon 6 processors with Intel® AMX, OPEA (an open-source AI software stack) and NetApp's trusted data management capabilities to deliver high-performance departmental AI. Designed for fewer than 10 concurrent users, it avoids unnecessary complexity and costs, giving departments the power of cutting-edge inferencing without overspending.

Pretrained large language models (LLMs) and access to proprietary data repositories mean NetApp AIpod Mini can deliver precise, context-aware insights. Even subtle differences in interpretation or language are handled effectively, enabling AI models to adapt uniquely to your organization. Leveraging RAG knowledge graphs reduces computational loads, optimizing costs and performance.

Enable simpler, faster AI implementation

NetApp AIpod Mini tackles traditional challenges of AI implementation head-on. The intuitive OPEA framework accelerates deployment and ensures compatibility with existing infrastructures, requiring less than 12U of rack space. Flexible configuration options make it easy to tailor the platform to specific workflows without adding overhead or complexity.

Automated processes powered by OPEA foster seamless scalability and adaptability, making NetApp AIpod Mini the go-to solution for evolving workflows. Easily update departmental models and ensure adaptive, dependable performance over time.

KEY FEATURES

Contextual accuracy and precision

- Uses pretrained LLMs to understand key business nuances, providing more precise results—even subtle differences in wording or interpretation are handled effectively.

Instant access to local knowledge

- Integrates with local and proprietary data repositories to tailor AI models to specific departmental needs.

Proven security

- NetApp is the only enterprise storage vendor who is validated to store top-secret data. Our certifications include:
 - FIPS 140-2 and FIPS 140-3
 - Department of Defense Information Network (DoDIN) Approved Products List (APL)
 - Common Criteria
 - U.S. National Security Agency (NSA) Commercial Solutions for Classified (CSfC) Components List

Cost savings

- Optimized processing power through use of a RAG knowledge graph reduces computational load and operating costs.
- Efficient data handling minimizes errors and the workload on staff, significantly reducing costs.

Optimize to achieve success

Designed for localized efficiency, NetApp AIpod Mini delivers tangible, high-impact results tailored to the unique needs of teams like legal, retail, and manufacturing. By automating and enhancing key processes such as contract compliance, inventory forecasting, and predictive maintenance, it allows departments to focus on their core priorities and strategic goals.

This cost-effective AI solution reduces resource consumption while increasing operational productivity. By processing workloads closer to data sources, it ensures stronger data privacy, enhances governance, and lowers operational expenses. NetApp AIpod Mini empowers teams to harness the full potential of AI, driving actionable insights and meaningful outcomes while staying agile and efficient at scale.

KEY USE CASES FOR SECURE DEPARTMENTAL AI INFERENCING

<p>CONTRACT REVIEW AND LEGAL INSIGHTS</p> <p>NetApp AIpod Mini enables legal teams to automate contract analysis, flagging compliance risks in seconds. This reduces reliance on external expertise and accelerates workflows.</p>	<p>MANUFACTURING AND PREDICTIVE MAINTENANCE</p> <p>Predict equipment failures before they occur with AI-powered analytics. Manufacturing teams can proactively address disruptions, minimize downtime, and cut maintenance costs.</p>	<p>INVENTORY MANAGEMENT AND OPTIMIZATION</p> <p>AI-powered real-time data insights refine inventory strategies and elevate customer experiences. With predictive analytics, retail teams can reduce overstocking and avoid stockouts while driving profitability..</p>

About NetApp

NetApp is the intelligent data infrastructure company, combining unified data storage, integrated data services, and CloudOps solutions to turn a world of disruption into opportunity for every customer. NetApp creates silo-free infrastructure, harnessing observability and AI to enable the industry's best data management. As the only enterprise-grade storage service natively embedded in the world's biggest clouds, our data storage delivers seamless flexibility. In addition, our data services create a data advantage through superior cyber resilience, governance, and application agility. Our CloudOps solutions provide continuous optimization of performance and efficiency through observability and AI. No matter the data type, workload, or environment, with NetApp you can transform your data infrastructure to realize your business possibilities. www.netapp.com
